Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Parties discussed a proposed amendment to claim 1 in order to define over the Saito reference. Specifically, applicants' representatives proposed additional language to emphasize multiple signal lines (transmitting input data and output data) from a single functional block. The examiner suggested some minor modifications to the proposed amendment consistent with the expressed intent of applicants' representatives. Additional dependent claims containing more specific features were also discussed. The examiner indicated that the amendments appear to distinguish over the limited disclosure of Saito, but further search and consideration would be necessary upon receiving applicants' formal response.
